PROFESSIONAL SUMMARY

Motivated BS Cybersecurity student at Air University, Islamabad (Semester 2, CGPA: 3.09), with hands-on experience in incident response concepts, vulnerability assessment, and CTF competitions. Actively participates in national and international Capture The Flag competitions (web exploitation, forensics, cryptography, OSINT, reverse engineering, and pwn). Built and deployed a live CTF platform for ~94 Air University students using Firebase. Possesses strong foundational knowledge across blue-team and offensive security domains, with a career focus on SOC analysis and digital defense.

EDUCATION

BS Cybersecurity — Air University, Islamabad

Sep 2025 – Oct 2029 (Expected)

National Center for Cyber Security (NCSA) | Department: NCSA | Section: BS-CYS-2A

- Current CGPA: 3.09 | Semester 2
- Coursework: Digital Logic Design, Linear Algebra, Applied Physics, OOP (C++), Intro to Cybersecurity

Intermediate (ICS) — Computer Science, Fazaia Inter College (FIC)

Jan 2023 – Sep 2025

- 92% in SSC, 87% in HSSC | Strong foundation in Computer Science and programming

CTF COMPETITIONS & CYBERSECURITY CHALLENGES

Hack4Bug CTF 2026 — 6th Place

2026

Team: AmogusPotionAt3AM (Hamid Rafique, Hassaan Arshad, Hashir Kamal)

- Competed across web exploitation, forensics, cryptography, and OSINT categories
- Demonstrated teamwork and real-time incident analysis under competition pressure

YECTF 2026

2026

- Solved challenges in web exploitation, cryptography (ECDSA nonce reuse, XOR), steganography, and OSINT
- Analyzed ELF binaries with anti-debug techniques and UPX-packed binaries through reverse engineering

PicoCTF / MCS CTF / PK-CERT CTF Square

Ongoing

- DNS exfiltration analysis via PCAP forensics, OSINT geolocation, SSTI exploitation, ret2win pwn
- Session exploitation and LFSR-AES cryptography challenges

PROJECTS

0xPh4nt0m: Fractured Signal — CTF Platform

2025–2026

Deployed on GitHub Pages | Firebase Realtime Database Backend

- Designed and deployed a full CTF platform for ~94 Air University students with whitelist-based registration
- Implemented admin panel, real-time leaderboard, first-blood tracking, and challenge management
- Skills: JavaScript · Firebase · GitHub Pages · Web Security · System Design

DLD Lab Project — Digital Stopwatch (MM:SS)

2026

- Designed and simulated a hardware stopwatch in Proteus using 74LS TTL ICs
- Components: 74LS90 counters, 74LS75 latches, 74LS47 BCD decoder, 74LS76 JK flip-flop, 7-segment displays
- Documented full wiring, control logic, and counter chain in a formal technical report

Security Analysis of Metasploitable 2 — Tenable Nessus

Nov–Dec 2025

Air University | Introduction to Cybersecurity Course

- Configured full pen-testing lab: Kali Linux + Tenable Nessus Essentials + Metasploitable 2 target
- Identified Critical/High/Medium severity vulnerabilities: Telnet, VSFTPD 2.3.4 backdoor, NFS flaws
- Ethically exploited vulnerabilities; applied remediation and verified with follow-up scans
- Skills: Vulnerability Assessment · Tenable Nessus · Kali Linux · Ethical Hacking · Remediation

ICT Quiz Website — Interactive Learning Platform

Nov–Dec 2025

Air University | Application of ICT Course

- Built a responsive 6-subject quiz platform with real-time timers, scoring, and quiz history
- Deployed on GitHub Pages; dark/light theme toggle and mobile-responsive design
- Skills: HTML5 · CSS3 · Vanilla JavaScript · GitHub Pages

SSH Brute-Force Detection — Splunk SIEM Lab

2025–2026 (Self-Directed)

Personal Portfolio Project | Ubuntu Server + Splunk

- Configured Ubuntu Server VM (192.168.149.131) as a log source for Splunk
- Built detection rules to identify SSH brute-force patterns in log data
- Part of a 10-project SOC analyst portfolio targeting blue-team career development

TECHNICAL SKILLS

Cybersecurity: Incident Response (Concepts), Vulnerability Assessment, Threat Intelligence (Introductory), SIEM (Splunk), Tenable Nessus, Ethical Hacking, OSINT, Malware Analysis Concepts, Wireshark, Nmap, Metasploit

CTF & Offensive Security: Web Exploitation (SQLi, SSTI, Session Hijacking), Binary RE (ELF Anti-Debug, UPX), Cryptography (ECDH, XOR, LFSR-AES), Forensics (PCAP, Steganography), Pwn (ret2win), OSINT

Operating Systems & Tools: Kali Linux (Primary), VMware, Wireshark, Nmap, Metasploit, Splunk, Tenable Nessus, Burp Suite (Introductory), Firebase

Programming: C++ (Intermediate), Python (Fundamentals), Bash Scripting, HTML5, CSS3, JavaScript

Version Control & DevOps: Git, GitHub, GitHub Pages, GitHub Actions

Networking: TCP/IP, DNS, PCAP Analysis, Network Protocols, Firewall Concepts

CERTIFICATIONS

Certification	Issued By	Date
ISO/IEC 27001:2022 Information Security Associate™	SkillFront	Dec 2025
Introduction to Python	DataCamp	Mar 2026
Introduction to Bash Scripting	DataCamp	Mar 2026
Intermediate Git	DataCamp	Mar 2026
GitHub Foundations	DataCamp	Mar 2026
AI Fundamentals	DataCamp	Mar 2026
Data Literacy	DataCamp	Mar 2026
Intermediate ChatGPT	DataCamp	Mar 2026
Introduction to GitHub Concepts	DataCamp	Mar 2026

Certification	Issued By	Date
Introduction to Git	DataCamp	Mar 2026

EXTRACURRICULAR & COMMUNITY

- CTF Platform Creator — Built and hosted '0xPh4nt0m: Fractured Signal' for Air University students
- Active CTF Competitor — Regular participant in national (PK-CERT CTF Square, MCS CTF, Hack4Bug) and international (picoCTF, YECTF) competitions
- Hack The Box & TryHackMe — Ongoing practice in offensive/defensive security, Linux, and system security
- Freelancing — Active Fiverr profile (hamidrafique341) offering cybersecurity, AI prompting, and web development services
- Self-Directed SOC Portfolio — Building a 10-project blue-team portfolio (SIEM detection, log analysis, intrusion detection) targeting SOC analyst readiness
